16. Instructions for Using DSN:

a. General. The Defense Switched Network (DSN) is the principle longhaul, voice communications network within the Defense Communications Systems, providing unsecure direct distance dialing service worldwide through a system of government-owned and leased automatic switching facilities. The purpose of DSN is to handle essential command and control, operations, logistic, intelligence, diplomatic, and administrative traffic.

b. Precedence. The Joint Uniform Telephone Communications Precedence System is directed for use by all authorized users of voice communications facilities of the Department of Defense. The effectiveness of the system depends upon the cooperation on the part of persons authorized to employ it; therefore, users must be familiar with the purpose to be served by each level of precedence category and the types of calls which may be assigned the respective precedence. Priority is the highest precedence available at Vance AFB.

(1) PRIORITY pre-empts lower precedence calls. PRIORITY is reserved for calls that require prompt completion for national defense and security, the successful conduct of war or to safeguard life or property, which do not require higher precedence.

(2) ROUTINE has no precedence over any other call, and is handled in sequence as placed by the calling party.

c. USE of DSN:

(1) Will be authorized for official communications.

(2) Will be restricted to:

(a) Those calls that are essential, and would stand the scrutiny afforded a commercial toll call.

(b) The minimum time required to accomplish the official business and should not normally exceed 5 minutes.

(c) The use of a precedence level in accordance with the subject matter of the call established in the Joint Uniform Telephone Communications Precedence System.

(3) Will not be authorized for:

(a) Use in areas adjacent to general gathering or recreational areas, or in general of MWR facilities.

(b) Calls within an installation metropolitan area, or those confined geographical areas where other existing government provided local services is adequate.

(c) Unofficial or personal calls.

(d) Off-net extension of calls into the commercial system at a distant PBX, except where such extension has

GENERAL INFORMATION SECTION

been previously approved by the local authorities controlling the switchboard.

(4) Telephone Monitoring. The user of the DSN system should be aware that this DoD system is for official use only and is subject to management monitoring in accordance with AFMAN 33-145.

Also, CallPilot requires that you change your password on a regular schedule set for 90 days. Keep your mailbox secure by choosing passwords that are not easily discovered.
- Decide on a system for choosing passwords that is easy for you to remember but hard for anyone else to guess. For example, you can create a unique and easy to remember password by combining letters and numbers on your telephone keypad.

Recording greetings and name

You can record external, internal, and temporary greetings. Callers from outside your organization hear your external greeting, callers within your organization hear your internal greeting. If you don't record an internal greeting, all callers hear your external greeting. All callers hear your temporary greeting if you record one. Your recorded name (Personal Verification) is used in your greetings and addressed messages, and in Express Messaging, Name Dialing, and Remote Notification announcements.

- 1) While logged in to your mailbox, press **8 2**.
- 2) Press **1** for External Greeting, **2** for Internal Greeting, **3** for Temporary Greeting, or **9** for Personal Verification.

- 4) Press # to end your recording.
- To review your recording, press **2**.
- To delete a greeting, press **7 6**.
- 5) Press **4** to return to your messages. When you record a temporary greeting, tell your callers the times or dates of your absence, and when you will retrieve your messages. You can set the month, day, and time for the greeting to expire. If you don't set an expiry date, the temporary greeting will stay in effect until you delete it.

Bomb Threats or Threatening Calls Received on Government Telephone:

- **Do Not Hang Up.**
- Activate Malicious Call Trace; From any base phone, press Switchhook, then press *57.
NOTE: If telephone set has a "Flash", "Link", or "Transfer" button, it must be used in place of the switchhook.
- Try to keep caller on the line.
- Signal someone to call Security Forces, 213-7200 or 213-7415.
- If no one is available, **DO NOT HANG UP**, but use another phone to notify Security Forces, 213-7200.
- Obtain as much information as possible about the call/caller using the Bomb Threat checklist on page 23 of this telephone directory.

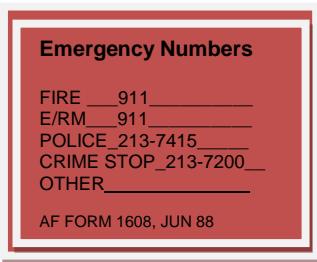

Note: Malicious Call Trace will aid Security Forces in identifying harassing, prank, bomb threat, 911 hang-ups, or other emergency type calls. Anytime Malicious Call Trace has been activated, Security Forces should be notified for further investigation into the call.

VoIP Users will follow the same procedure for MCT, as standard telephone users, with the exception of activation. VoIP users will activate MCT, **AFTER** the call has been terminated. When MCT is activated, VoIP users will receive a MCT successful/unsuccessful voice message.

COMSEC: The telephone system on Vance Air Force Base is not secure. Classified information should not be discussed or revealed over non-secure telephones. Do not "TALK AROUND" classified information. Personnel who make disclosures of classified information during a conversation on a telephone are subject to disciplinary actions. Secure voice is available at Vance AFB via the STE secure telephone. Locations of STE telephones are listed on the inside back cover of this directory.

All base telephones should have "red" stickers:

- **Do Not Discuss Classified Information, DD Form 2056**
- **Emergency Numbers, AF Form 1608**
- **"Yellow" BombThreat Card, AF Form 440**
